

# project power

walling built better

## blockwork too heavy and slow

Quest Hotel, 23 Miles Platting Road, Eight Miles Plains QLD

### A builder willing to accommodate a change

After some 300 commercial projects, Graystone is adept at meeting completions and budgets. So, when it chooses a new supplier and construction method it's obviously one that stacks up.

### Our customer says...

#### afs logicwall® means lighter loads and less lifts

We chose the afs logicwall® system for its speed of construction and the substantial advantage of it being a finished wall once set and painted. Once on site it was installed extremely quickly by the AFS-recommended installers—saving us considerable time.

Having always been a conventional block builder, this project's program presented a challenge but using logicwall® meant reduced lifts of block, sand and cement. Amazingly, we needed only mobile cranes due to there being just three lifts per floor, including the steel for logicwall®. And the unloading of waste was also exceptionally easy.

We were really impressed with both logicwall® and the AFS team's support, so much so that we'll enjoy working with them again. **Clint Bellany, Project Manager, Graystone Constructions**
