

## UPPER ROMA STREET, BRISBANE, QLD

### Site programme smashed!

This large multi-residential development in Brisbane was erected with ultimate speed, with structure completion date a whole 6 weeks ahead of construction program! The Project Manager and Site Manager were very pleased with the performance of the product and the Installation team.

The AFS LOGICWALL® and HD Projects install team came highly recommended by the Formworker, based on excellent working relationships on several previous projects. This was achieved through AFS' proven strong capacity, reliability of supply and professionalism onsite.

### FACTS & FIGURES

**Units**

46 units

**Height**

10 levels

- AFS 150 Corridor Walls
- AFS 150 Internal Walls
- AFS 162 Party Walls
- AFS 200 Lift & Stair Shafts

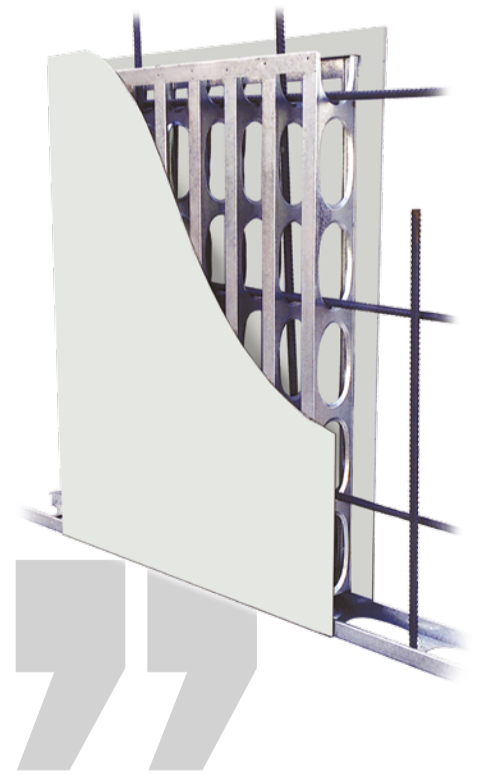

## WHAT OUR CLIENT SAYS...

"AFS walls provided real time savings for our project and the ability to finish the face of the walls resulted in a cost saving for claddings and linings. The acoustic performance of the party walls also saved time and money as AFS ticked boxes structurally, acoustically and for inter-tenancy fire rating."

**Builder**

"Our current clients prefer to use AFS over alternative building products due the speed of construction."
