

MYSTÈRE APARTMENTS, MACQUARIE, ACT

Both AFS LOGICWALL® and REDIWALL® were utilised in Mystère Apartments located in Canberra. The site was a corner site with difficult access due to the close proximity of power lines, however AFS Walling provided a perfect solution due to minimal crane and material handling requirement.

REDIWALL® provided a quick, clean pre-finished alternative for basement retaining walls whilst AFS LOGICWALL® provided a fire rated and load bearing alternative for internal and external lift/stair and corridor walls.

AFS 200mm Blade Walls

AFS 162mm Party Walls

AFS 162mm External Walls

WHAT OUR CLIENTS SAY...

"AFS provided a prefabricated walling system for our project that was structurally efficient, fast to erect and clean to use.

AFS LOGICWALL® was designed as load bearing, fire rated walls throughout the structure which exceeded requirements for structural & fire rating compliance.

The REDIWALL® product was used for the basement retaining walls which provided a quick, clean & light-weight solution.

Our site was a busy corner site with restrictions due to power lines.

AFS Walling provided a walling solution consisting of light-weight, shop drawn, hand erected panels.

Overall, we are very pleased with the structural performance of the AFS LOGICWALL® & REDIWALL® Walling Systems and the superior speed of installation."
