

## AURUM APARTMENTS 7 – 11 TURRAMURRA AVENUE, TURRAMURRA NSW

AFS LOGICWALL® was utilized on the Aurum Apartments Project as it provided:

- Significant material handling efficiencies (dramatically reducing craneage required).
- Speed of construction.
- A shop drawn system which eliminated waste and was directly responsible for a clean worksite.
- A high quality, low maintenance system.

These characteristics were key to AFS LOGICWALL® providing the ideal solution to this project.

### FACTS & FIGURES

**Units**

LOGICWALL® 162mm Blade Columns  
LOGICWALL® 162mm Lift & Stair Shaft  
LOGICWALL® 200mm Blade Columns

## WHAT OUR CLIENTS SAY...

"AFS LOGICWALL® was used as an alternative to load bearing masonry.

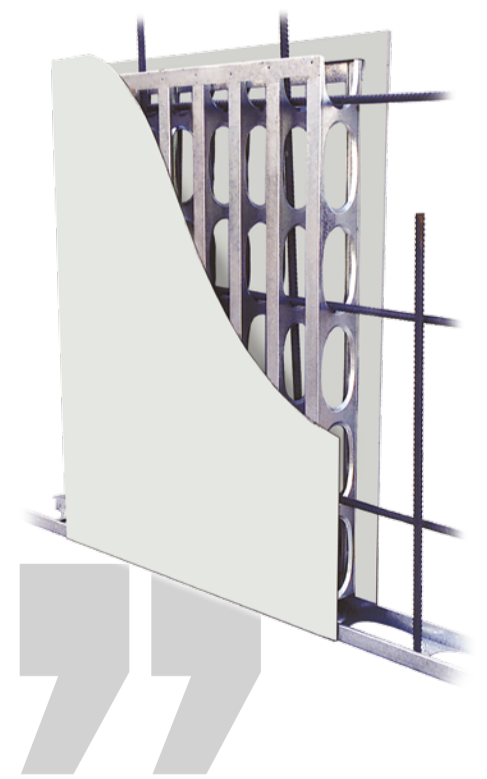

We found that LOGICWALL® provided huge efficiencies in both delivery and craneage into the site reducing truck movements and crane dependency by 80%. In addition to this the speed of installation by AFS LOGICWALL® installation specialists HD Projects was impressive – just 4 days per floor compared to 2 weeks for brickwork!

Also, with a shop drawn system, LOGICWALL® offered the benefit of an extremely clean site due to lack of waste, which in turn reduced the clean-up labour required for the duration of the project.

Overall AFS LOGICWALL® offered an extremely durable, robust wall surface featuring a high quality finish".
