

PROJECT POWER

Conventional systems just didn't stack up in this multi-res

• BROWN STREET, ASHFIELD NSW

When walls go up quickly floors can go up fast

Chief among the many benefits AFS LOGICWALL® offered this project was lightening quick floor-cycles. And the builders were also more than pleased with the superb level of finish it provided.

Billed as a “aesthetically beautiful development combining single and multi-level options”, these apartments couldn't afford to be found wanting in their quality of presentation. So, it was particularly pleasing to find that using LOGICWALL® meant there was no need to worry about over-sheeting.

Don't just take our word for it...

“WE USED LOGICWALL® on this project and found that it could be constructed quickly—enabling fast floor-cycles. It also made materials handling considerably easier and more efficient, particularly as it wasn't crane dependent for horizontal distribution. Additionally, LOGICWALL® provided us with a high quality finish that didn't need over-sheeting. In comparison, there were simply too many disadvantages in using a conventional system.” FRED NASSIF, GENERAL MANAGER, NORTHLAND CONSTRUCTIONS
