

# PROJECT POWER

Engineered for impact in the present with an eye to the future

AFS LOGICWALL® offers clean, even surfaces

- COAST, LABRADOR QLD

## Using LOGICWALL® to get a quicker, stronger and better finish

The visually stunning Coast, Labrador's newest high-quality residential development, has been engineered by Cozens Regan Williams Prove.

Focussing on speed of construction and cost effectiveness, CRWP (in conjunction with the architect) adopted AFS LOGICWALL® instead of insitu concrete for Coast's 14 floors. They knew that LOGICWALL® would easily satisfy owners' expectations for excellence in both internal and external walling.

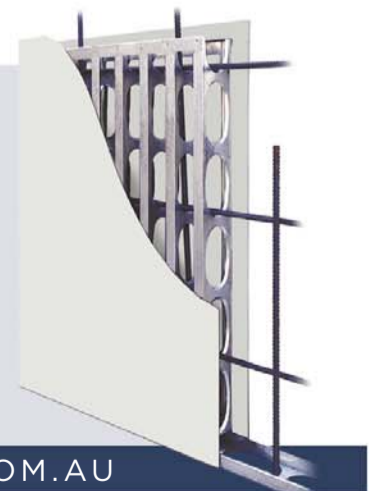

124 UNITS	14 STOREYS
11,036m <sup>2</sup> LOGICWALL®	

- AFS LOGICWALL® 162mm party walls
- AFS LOGICWALL® 162mm corridor walls
- AFS LOGICWALL® 162mm external walls
- AFS LOGICWALL® 200mm lift & stair walls

### Don't just take our word for it...

As a Gold Coast consulting firm with 45+ years in the industry, we need products that benefit our clients with practical and cost effective solutions. For Coast we selected AFS Walling Solutions which was specified for all load bearing walls, including stair and lift cores, as an alternative to cast insitu concrete walls. This provided our client with cost-savings and faster lead times for vertical elements.

ADAM GIBBONS, COZENS REGAN WILLIAMS PROVE.
