

PROJECT POWER

Speed of system adds Zest to construction times

• ZEST APARTMENTS, FRANKLIN ACT

AFS meets delivery dates and passes expectations

You need a lot of walls in 78 units so you need a supplier that delivers on time—time after time. Geocon knew that AFS LOGICWALL® was ideal for all of Zest’s internal and external walling. They also recognised that AFS REDIWALL® would perform just as well around stairs and below ground.

A mix of 1, 2 and 3-bedrooms, Zest’s apartments were completed impressively in just 9½ months. And Geocon readily point to the AFS walling systems as enabling quick construction without having to sacrifice quality.

78 UNITS	3 + 1 STOREYS
1,386m ² REDIWALL®	6,190m ² LOGICWALL®

- AFS LOGICWALL® 120mm external walls
- AFS LOGICWALL® 120mm internal walls
- AFS LOGICWALL® 120mm blade columns
- AFS LOGICWALL® 120mm lift & stair walls
- AFS LOGICWALL® 200mm blade columns
- AFS REDIWALL® 200mm lift & stair walls
- AFS REDIWALL® 200mm basement retaining walls

Don't just take our word for it...

We used AFS LOGICWALL® for external walls and internal partition walls and AFS REDIWALL® for the basements walls on the Zest Apartments Project. We can attribute the ease and speed of construction during structure to the use of the LOGICWALL® and REDIWALL® Systems. AFS always met their delivery dates and were always very helpful, from detailing shop drawings to delivery on site.”
Damian Rumball, Project Co-ordinator, GEOCON
