

# PROJECT POWER

LOGICWALL® provides lightweight but load-bearing solution

- CAMPUS APARTMENTS, 1A GARDINER ROAD, CLAYTON VIC

## LOGICWALL® panels go up while crantage goes down

When you have a 50 year old reputation for excellence, you look for materials that equal your standards. Award-winning builder L.U. Simon found that 'match' with AFS LOGICWALL® when constructing the Campus apartments and townhouses.

And choosing LOGICWALL® over precast panels made materials handling much easier. Which in turn, greatly reduced crantage and (importantly) costs.

Little wonder architects, builders and engineers are enjoying similar win-wins with LOGICWALL® in literally thousands of projects.

164 UNITS	4 + 1 STOREYS
17 TOWNHOUSES	1,125m <sup>2</sup> LOGICWALL®

AFS LOGICWALL® 120mm party walls  
AFS LOGICWALL® 150mm party walls  
AFS LOGICWALL® 162mm party walls

### Don't just take our word for it...

The **substitution** of the AFS LOGICWALL® system in lieu of precast panels in select internal locations reduced the required capacity of the mobile cranes to achieve the reach from the available loading zones when certain walls were substituted.

This also reduced the number of crane lifts required per floor which resulted in lower crantage costs as the number of visits was also reduced. **GEORGE MOSCHOYIANNIS, SENIOR PROJECT MANAGER, L.U. SIMON BUILDERS**
