

PROJECT POWER

LOGICWALL® turns first-time customers into frequent ones

• FLORENTIA TOWNHOUSES, 4 FLORENCE STREET, BRUNSWICK VIC

Repeat-customer repeats success with LOGICWALL®

Experienced with AFS LOGICWALL®, Ausmet Developments knew the system was perfect for their Florentia Townhouses project. Being a small development it needed fast floor cycles and they certainly got that with just three months for completion.

Using LOGICWALL® as a finished wall for ground level internal applications meant simply taping, setting and then painting to get a high quality, hard-wearing, low maintenance surface finish.

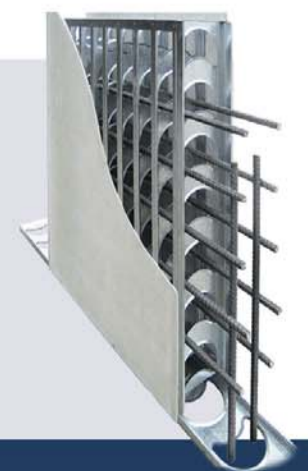

Whether yours is a smaller townhouse project or a larger multi-residential one, LOGICWALL® offers a clean, easy alternative that reduces construction time but not quality.

9 UNITS	3 STOREYS
1 BUILDING	1,117m ² LOGICWALL®

- AFS LOGICWALL® 150mm int/ext walls
- AFS LOGICWALL® 150mm balustrade walls

- AFS LOGICWALL® 162mm party walls
- AFS LOGICWALL® 162mm parapet walls
- AFS LOGICWALL® 162mm lift & stair walls

Don't just take our word for it...

The AFS LOGICWALL® system is quick, clean and simple which is why we made the decision to use it on our Florentia Townhouses project. The fibre cement panels were quick and easy to install providing fast floor cycles and coupled with the simplicity of the finishing process meant we were able to meet our completion deadlines without sacrificing quality. I would recommend AFS LOGICWALL® and look forward to using it on future projects." **MURAT CETINKAYA, DIRECTOR, AUSMET DEVELOPMENTS**
