

PROJECT POWER

LOGICWALL® odds-on favourite at racecourse site

- ASCOT APARTMENTS, WESTON STREET, ROSEHILL NSW

Conventional walling proves too slow against LOGICWALL®

Nucorp Constructions looked to minimise construction time on their substantial Rosehill project but were not willing to sacrifice durability or quality to achieve it. And, as the build-quality was to be a key factor in marketing the apartments, they chose AFS as a supplier with a tried and tested solution: LOGICWALL®.

In using LOGICWALL® throughout Ascot Apartments, NuCorp reduced installation times on every floor by two days – something they readily admit was well beyond conventional walling methods.

132 UNITS	13 + 2 STOREYS
1 BUILDING	11,964m ² LOGICWALL®

AFS LOGICWALL® 150mm corridor walls
 AFS LOGICWALL® 150mm external walls
 AFS LOGICWALL® 162mm party walls
 AFS LOGICWALL® 200mm blade walls
 AFS LOGICWALL® 200mm lift & stair core

Don't just take our word for it...

Right from the outset, our Rosehill project was designed in AFS LOGICWALL® for the potential time savings. And LOGICWALL® proved to be a quick, effective alternative to conventional building methods, due to the ease and speed of installation coupled with the clean finished product. LOGICWALL® sped up our building program and saved two days per floor so AFS was a smart choice."
