

# PROJECT POWER

Apartment block avoids waste and mess of blockwork

• 20-22 PRIMROSE STREET, SHERWOOD QLD

## AFS systems well up to the standard and well above conventional method

Opting against using block work, BulkBuild were keen to see how AFS LOGICWALL® and AFS REDIWALL® would live up to their reputations as high quality, cost-effective walling systems.

Impressed with the shop-drawn accuracy, easy delivery and even easier materials handling, there was also significantly less waste compared to block work. Perhaps the best indicator of BulkBuild's success with their initial use of AFS systems was captured in their quote "...a very enjoyable experience...so much so that our director has now had AFS fully designed into his very own development...".

24 UNITS	5 STOREYS
250m <sup>2</sup> REDIWALL®	2,179m <sup>2</sup> LOGICWALL®

AFS LOGICWALL® 150mm external walls  
 AFS LOGICWALL® 162mm party walls  
 AFS LOGICWALL® 200mm lift & stair core  
 AFS REDIWALL® 200mm basement retaining walls

### Don't just take our word for it...

AFS LOGICWALL® and REDIWALL® systems were chosen over blockwork for ground floor walls through to rooftop. Not only were we chasing a tight program on this project, AFS LOGICWALL® and REDIWALL® systems are shop drawn and delivered to site in packs allocated for all areas across the slab. And being delivered on just two semis, meant significant reductions in crane time. We will be using AFS across our other key client projects ongoing.
