

# PROJECT POWER

McNab is not interested in just being 'well regarded'...

• 33 SCHOOL ROAD, KELVIN GROVE QLD

Builder wants to be 'legendary' and is using LOGICWALL® on the way

84 UNITS	4 STOREYS
724m <sup>2</sup> REDIWALL®	3,494m <sup>2</sup> LOGICWALL®

McNab Constructions consider 'good' to be *not nearly good enough*, they want to deliver 'incredible'. And, obviously, they need walling systems capable of supporting that lofty standard so they choose AFS LOGICWALL® and AFS REDIWALL®.

AFS REDIWALL® 200mm car park areas  
AFS LOGICWALL® 150mm external walls  
AFS LOGICWALL® 162mm party walls  
AFS LOGICWALL® 200mm lift & stairs

Aged care, residential, retail...regardless of which industry they are building for, McNab knows that AFS has the walling systems and support to ensure budgets are stuck to and deadlines are met.

Clients give McNab 4.5 out of 5, McNab says AFS will help keep it that way.

Don't just take our word for it...

We chose AFS LOGICWALL® system due to its load bearing structural capacity, along with the speed and cleanliness on site. The LOGICWALL® system is a shop-drawn one which dramatically reduced material handling and waste on site.

With the accelerated floor cycles we stayed well ahead of our project program—handing over to our extremely satisfied client two months ahead of schedule. The AFS support team offered us the complete package and we will enjoy working with them on future projects.
