LOGICWALL® HELPS QUEENSLAND BUILDER SHINE

• 47 HOOD STREET, SHERWOOD, QLD

Queensland builder avoids blockwork to beat deadline—big time

16 APARTMENTS	5 STOREYS
1 BUILDING	2,240m ² LOGICWALL®

Apprised of Indigo Building Group's reputation for quality, 47 Hood Street's new owners were not surprised by its finish but they were thrilled by its completion: a whopping one and a half months ahead of the game.

Having selected AFS LOGICWALL® on an earlier project Indigo Building Group knew it would provide walling to complement their prestigious apartments. However, something they perhaps weren't expecting was the greatly accelerated floor cycles that can come from using LOGICWALL®.

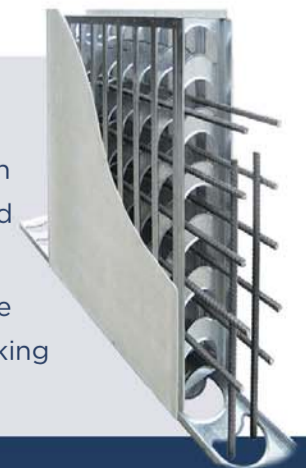

Marketed as having a 'simplicity of design', Hood Street most certainly also had a simplicity of construction.

AFS LOGICWALL® 200mm lift & stair core
AFS LOGICWALL® 162mm party walls
AFS LOGICWALL® 150mm external walls and balustrades

Don't just take our word for it...

Indigo Building Group has used the AFS LOGICWALL® system across two projects, with a third and fourth currently in design. We choose LOGICWALL® for its load bearing structural capacity, along with the speed and cleanliness on site—being a shop drawn system, it dramatically reduces site waste.

And the accelerated floor cycles meant we stayed well ahead of our project program, handing over to the occupants 1.5 months earlier than scheduled. AFS offers us the complete package and we will enjoy working with them across our live and future projects." **DAVID HUNT, DIRECTOR, INDIGO BUILDING GROUP (QLD)**
