BUILDER ENJOYS WALLS BUILT BETTER THAN BLOCKWORK

• 57-59 KINGSFORD SMITH PARADE, MAROOCHYDORE, QUEENSLAND

LOGICWALL® lessens time, lowers cost and reduces waste

32 APARTMENTS	5 STOREYS
1 BUILDING	3,142m ² LOGICWALL®

When your reputation is as good as Vantage Building Group's you don't risk it using materials and systems that fall short. With this in mind they chose AFS LOGICWALL® for their prestigious new Cotton Tree apartments and were handsomely rewarded.

The advantages in construction over time-consuming blockwork were exceedingly and almost immediately obvious. As Vantage happily recounts: LOGICWALL® is shop-drawn accurate, quicker to install, and results in considerably less site debris—meaning much lower clean-up costs.

Released to an eager market, the speed of sales confirmed the quality of this project and Vantage's advocacy for LOGICWALL®.

AFS LOGICWALL® 150mm external walls
AFS LOGICWALL® 162mm party walls

Don't just take our word for it...

"We chose AFS LOGICWALL® over blockwork for our Kingsford Smith Parade Project for its time and cost efficiencies. And it proved to be a fast, effective alternative to conventional building methods, particularly its speedy installation and clean finish. Additionally, as LOGICWALL® is a shop drawn system onsite waste was significantly lower. We were very happy with this system and will use it in the future."

JAMIE GLOVER, PROJECT DEVELOPMENT MANAGER, VANTAGE BUILDING GROUP
