

project power

walling built better

can't go back to blockwork

62 Primrose Street, Sherwood QLD

Perfection starts with the materials they use

Indigo Building Group guarantees their projects will be of the highest construction quality by insisting on doing the building 'in house'. And, being professional purists they look for building material suppliers that share their standards which is why they looked no further than AFS.

Our customer says...

No hesitation in choosing no-hassle walling systems

Indigo Building Group is about to use an AFS system for the fourth time as we have had great results with both afs logicwall® and rediwall® walling. Once you have experienced the speed and cleanliness on site you would almost never consider going back to block.

The Primrose project was our new project manager's first exposure to the shop-drawn accuracy of logicwall® and it went extremely well, particularly with the dramatic reduction in craning time to load each deck. The accelerated floor cycles meant we stayed ahead of our completion program and the after-sales site support service was invaluable. We will certainly enjoy working with AFS in the future.

David Hunt, Director, Indigo Building Group
