walling built better

Landmark project uses benchmark walling

77 Jane Street, West End QLD 4101

Bohemia built on a standard

While this project's builder was capable of any kind of construction, they were resolute on their choice of materials. It had to be 'best-in-class' and come from a supplier with a reputation equal to theirs. AFS Logicwall® ticked all the boxes for Bohemia.

Our customer says...

Floored by the walling

The logicwall® system was incorporated into the structural elements by the certifying engineer. The simple (yet effective) elements worked extremely well and in turn delivered a superior program advantage over conventional construction methods. The lift, stairs and blade walls provided the developer and prospective buyers with attractive open plan living in this prestigious West End project.

Paul Maher, Project Manager

94 apartments	8 storeys
3,700m ² afs logicwall®	

afs logicwall® application

- blade walls
- stair and lift cores
