walling built better

Convinced and converted

The Boulevard Apartments—Prevue, 114–116 The Boulevard, Dulwich Hill

Our customer says: ‘shop drawing avoided potential issues’

The architects specified afs logicwall® and, after our review of comparable products, it seemed the superior choice. From the shop drawing to installation and then concrete pouring proved to be an incredibly easy process. Likewise, using afs rediwall® in the basement achieved the same efficient results.

We have previously used similar products but AFS and their certified logicwall® installer, RS Projects, made construction of these walls so much easier. The communication between Loxton Builders, AFS and RS Projects was fantastic, shop drawing eliminated potential issues and the labelled panels were installed quickly. Using logicwall®, along with the support and services from AFS and RS Projects, allowed us to build a complex geometric structure easily without error—making it ideal to work with. We will use logicwall® and rediwall® again.
