walling built better

Builder measures success in metres

The Grace (Stage One), 2–4 Lodge Street, Hornsby NSW 2077

Our customer says:

Project after project proves the point

AFS Logicwall® and Rediwall® have been our preferred walling solutions in projects for many years. For this one, we used rediwall® throughout the basement as the pvc-quality finish means we don't have to undertake any additional finishing. And for above ground walling, we chose logicwall® as experience has proven it to be outstanding.

From the beginning in planning through to the install, everything was easy. The shop drawing process meant our logicwall® panels arrived on site labelled to plan and could be installed with accuracy. We have always found that lead times for both logicwall® and rediwall® are superior to similar products on the market, which is extremely important to our construction schedule.

HOWARD DABIT, MANAGING DIRECTOR, DRAYCON BUILDING
