

Recycling

AFS Rediwall®

AFS is committed to manufacturing and supplying sustainable solutions to the building industry in an environmentally responsible manner.

Besides offering cut to length panels to minimise waste, we have also commissioned TechPlas to improve how we recycle AFS Rediwall® materials in **NSW**.

Booking process:

1

Determine if your product is suitable to be recycled.

Is it suitable?

- Product is clean of cement, paint, glue, dust or any other contaminations.
- Offcuts are packed in standard Bulka bags with slings.
- Before and after packing photos taken to send with request.

2

Request a booking.

Clearly state either pick up / drop off request, then send email to:

Chris Schaumann
chriss@techplas.com.au or **02 9636 6755**

Note: Drop off location is Pendle Hill, NSW.

4

Pick up / drop off following instructions in your confirmation email.

3

Receive your confirmation email with pick up / drop off information.

Recycling is free of charge with AFS and TechPlas.

Important information

- ▼ This initiative is available for NSW only.
- ▼ To ensure that the correct product is being sent in the correct size, packing and contamination free, before and after packing photos must be sent with the request.
- ▼ TechPlas will recycle the product at no cost for AFS customers.
- ▼ TechPlas have the right to refuse the pick up or to return if it is found to be contaminated. Examples of contamination could be concrete stuck to the product, or product covered in dust or oil after being left in the open.

Please contact TechPlas with any additional questions:
